

# Dining table 2

A cherry table built in 2 sizes: for 4 and 8 diners. The small version was designed to fit in a small dining alcove and is very compact.

The top is cherry paper back veneer over a MDF substrate with solid cherry edging. In the centre is an inset display case with zinc lining and a removable glass top.

The legs have a "hip" reminiscent of the top of a traditional cabriole leg but are modern and sleek and sensual. They are attached to the skirt with a connector I invented myself and had custom built.
